

# Healthy Soils Workshop

Healthy soils + healthy animals  
+ healthy people = healthy profit

## Increase the overall health, productivity and value of your land.

Based on the highly regarded **GrazingforProfit™** School, the RCS Healthy Soils Workshop is focused on understanding the strong link between how biology and the nutrient components are managed to improve the health of land and profitability of business:

- ✓ Understand the role livestock play in this cycle
- ✓ Increasing ground cover to reduce erosion
- ✓ Improve sustainable farm practices

### The primary benefits gained for attending this motivational one day program include:

- ✓ Understanding the linkages between healthy soils, healthy crops, healthy animals, healthy people and healthy profit
- ✓ Understanding how, as land managers, we influences those linkages
- ✓ Motivation and discussion of cutting edge topics
- ✓ Practical tools and tips to take home and implement

The knowledge gained in this fascinating workshop will empower participants to increase the overall health, productivity and value of their land.

The Healthy Soils Workshop content will also include the Principles of Sustainable Grazing, how plants operate and the Ecological Management Model.

Would you like to see this workshop run in your area?

With a minimum of 15 registrants RCS will bring the Healthy Soils Workshop to you!
